

Aluminum Decking

Fortis® Aluminum Decking is an eco-friendly, non-watertight aluminum deck board for outdoor areas that do not require dry space underneath.

With clean lines and modern design, Fortis adds long-lasting beauty, value, and durability to your outdoor living space.

This aluminum deck board with a hidden fastener system is simple to install, low-maintenance, and highly durable—making it the perfect solution for both commercial and residential decking applications.

APPEARANCE: Refined, modern design complements any architectural style, adding long lasting beauty and increasing property value.

LOW MAINTENANCE: No time or money spent sanding, painting, or sealing. Enjoy your deck without the hassle of routine maintenance.

SAFETY: Fortis stays cooler than almost all other decking materials, and the non-slip surface provides steady footing in wet or dry environments.

DURABILITY: Resists staining, impervious to insects, and won't splinter, decay, or rot.

EASY INSTALLATION: Pre-grooved planks with a hidden fastener system make installation simple for any building professional, DIYer, or handyman.
